

StreamFlix Data Quality Report

Phase 1 - Data Loading, Cleaning & Validation

This report summarizes the data quality assessment performed on all StreamFlix datasets. The following checks were completed: • Missing Value Analysis • Duplicate Detection • Primary Key Validation • Data Type Validation • Referential Integrity • Business Rule Validation • Outlier Detection

Dataset Summary

Dataset	Rows	Columns	Missing	Duplicates	Memory (MB)	Health %
Subscribers	15000	14	11199	0	7.29	94.67%
Titles	9000	21	1966	0	6.77	98.96%
Watch History	650000	10	0	0	189.6	100.0%
Ratings	130000	5	0	0	19.34	100.0%
Reviews	110000	7	70643	0	34.52	90.83%
Watchlist	65000	5	0	0	9.3	100.0%

Validation Results

Validation Check	Failed Records
Invalid Subscriber IDs	0
Invalid Title IDs	0
Invalid Watchlist Subscriber	0
Invalid Watchlist Title	0
Invalid Churn Date	6
Active with Churn Date	11199
Completion Errors	0
Watch Duration Errors	0
Invalid Sentiment	0
Invalid Rating	0
Invalid Age	0
Invalid Release Year	0
monthly_price_usd Outliers	0
age Outliers	55

watch_duration_min Outliers	60005
license_cost_usd Outliers	700
quality_score Outliers	27
total_watch_hours Outliers	786

Conclusion

The Phase 1 Data Cleaning process completed successfully. Total datasets analysed: **6**

Validation checks performed: **18**

The cleaned datasets are now ready for Exploratory Data Analysis (EDA), KPI calculation, SQL analysis, and Power BI dashboard development.
